

Senior Management Workshops

Green Ant Consulting can facilitate workshops for senior managers who are responsible for the future direction and development of their organisation.

Some popular examples include:

- * **Strategic Planning** - Planning is an essential part of managing in today's competitive environment. This workshop will give you the opportunity to consider your planning process and to apply planning models to your business.
- * **Managing Knowledge** - Knowledge is now considered to be one of the most important company assets and the most difficult to hold on to! This workshop will give you the opportunity to explore the nature and importance of knowledge within your organisation and to consider methods of capturing and utilising knowledge to maintain and enhance competitive advantage.
- * **Managing Change** - Change is most successful when driven from the top. Senior managers will benefit from the opportunity to develop a strategy for communicating and implementing change within the organisation.
- * **Facilitation** of planning sessions around current issues.

Events and workshops will be designed with you to suit your particular needs. Workshops can be designed as one-off events, as part of a longer term programme or short 'taster' sessions.

Our follow-up and evaluation service ensures that your managers experience real benefits back in the workplace.
